

Nitrile Lip Seals

PRODUCT OVERVIEW

Tides Marine Nitrile Lip Seals are specifically designed for each type of sealing application, whether propeller shaft or rudder stock. They are the only seals which are covered by the Tides Warranty. The outer shell is made of an Aramid fiber composite which is integrally molded to a rubber hinge and a nitrile lip edge. A 316-stainless steel garter spring is incorporated to distribute loads uniformly over the propeller shaft or rudder stock.

BEFORE ORDERING

Note:

When re-ordering, please supply the 4 or 5 digit number from the face of the lip seal to make certain you receive the correct replacement part.

Nitrile Lip Seals
